

A MINI PROJECT BOOKING MANAGEMENT SYSTEM

**Under the guidance :- Anurag Mishra
Name of the Mentor :- Anurag Mishra**

Lovely Professional University

L OVELY
P ROFESSIONAL
U NIVERSITY

**- Submitted By
Group name :- akatsuki_KOC29_CipherSchools**

**Name :- Asim Rana, Suryansh Dev Kalchuri,
Harsh Sharma
Reg Number :- 12217220, 12222338, 12217199
Section :- KOC29**

FLOW OF PROJECT:-

We, 3 members had worked kind a technically and also by gathering the information from google. The project is based upon HTML and CSS.

Role of each member:-

Asim Rana :- Hovering effect, Navigation Bar, Side bar

Suryansh Dev Kalchuri :- Styling of buttons, positioning of images

Harsh Sharma :- Text color, Selection of images

Technologies used

1. <tr> tag used to create tables
2. <h> header tag used to add text
3. <style> tag used for width and height
4. <p> tag used to write a paragraph
5. <bg color> tag for background colour
6. <center> tag used for alignment
7. <lable> tag used for customer credential input
8. <hover>tag used to select elements when you mouse over them
9. tag used to mark up a part of a text, or a part of a document

Many other tags have been used some screenshots on coming page

HTML:-

```
<!DOCTYPE html>
<html lang="en">

Introduction:-

An online movie ticketing system is a digital platform that allows customers to access the services of a business, reserve seats and buy tickets. This platform provides details such as what time a movie will be played, what seats are available, movie previews and so much more.

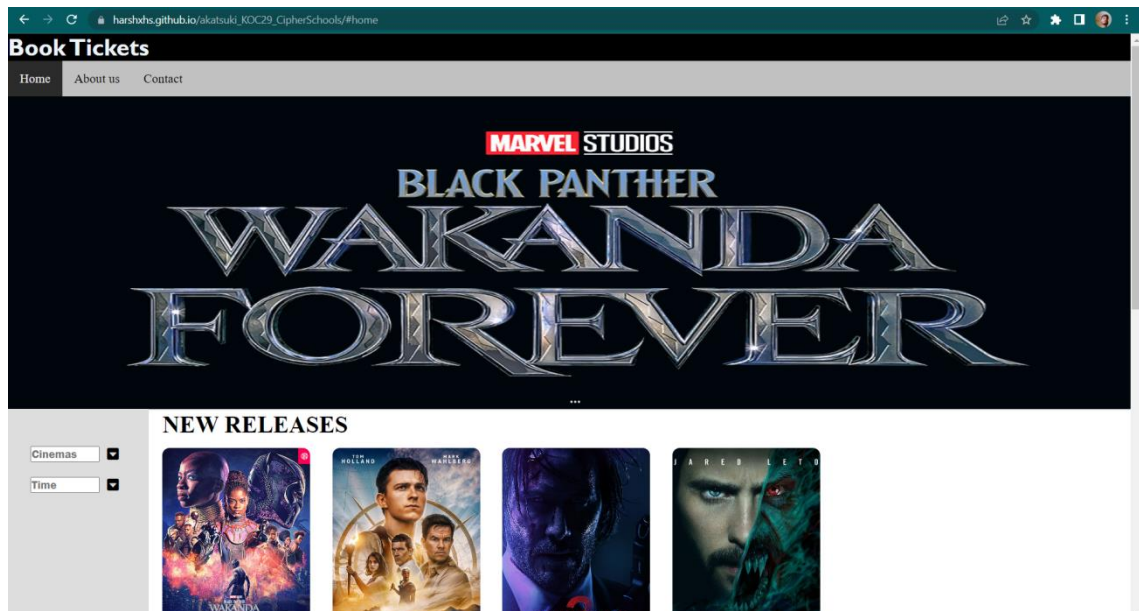

Benefits:-

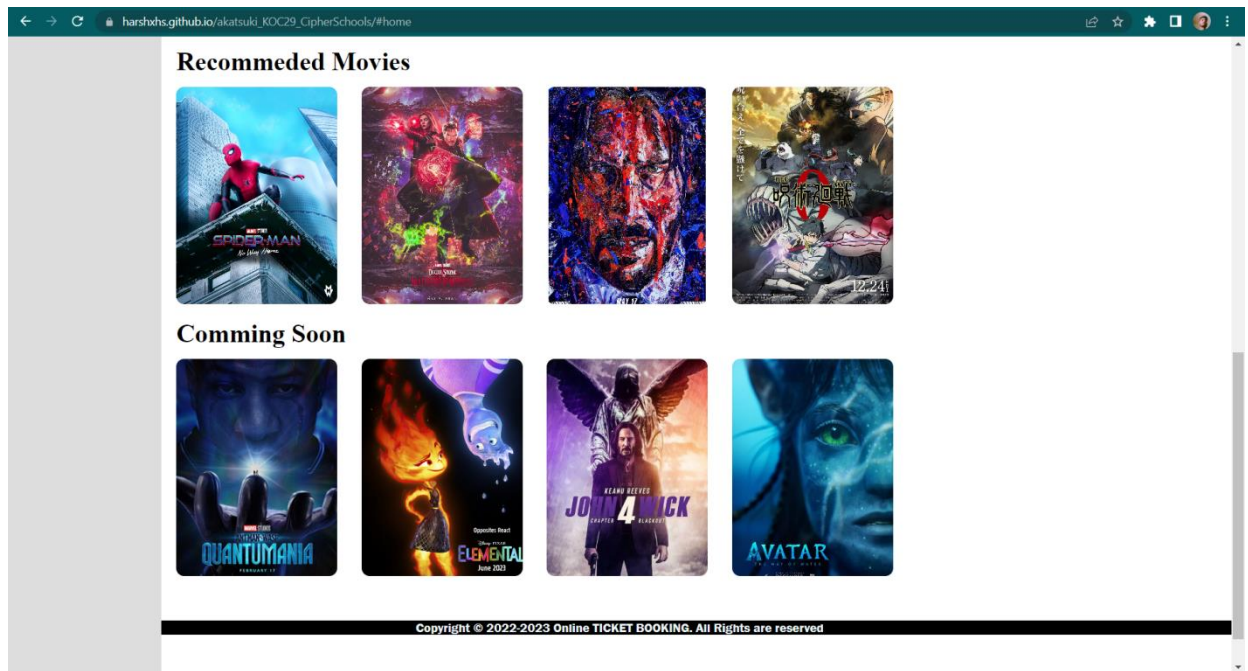

1. Online booking systems and scheduling software save your staff time
2. Removing the bottleneck of phone booking systems
3. Greater sales and marketing synergy
4. Increased revenue
5. A modern approach to booking
6. Can come at a cost

Objectives of Booking management system:-

There are several reasons why a business would opt for an online booking system. Some of them include;

1. **Remote** - An online system allows customers to access services from the comfort of their homes. As long as a user has access to a phone or computer, they can get easy access to the services available.
2. **Minimize Traffic** - Making services easily accessible to the customers means that fewer will be coming to purchase from the ticket window. This might also cut costs for the business because they will not need so many at the ticket windows. Employees will be able to direct their energies elsewhere.
3. **Constant Service** - Online platforms don't need a break or the night off. They can run constantly, giving every customer the benefit of accessing information at any time of the day.
4. **Increased Revenue** - When a business has an online service platform, there is no limit to the number of people it can reach. It is not limited by the time either because it operates 24/7. This means that promotions and ads can run throughout and this could potentially boost sales.

Conclusion :-

It has been a great pleasure for us to work on this exciting project. This project proved good for us as it provided practical knowledge programming, it also provides knowledge about the latest technology used in web developing that will be great demand in future. This will provide better opportunities and guidance in future in developing projects independently.

THANK YOU
